EmaLite

CAPABILITY STATEMENT

What we do, on two pages.

For procurement, prequalification and the folder where someone will look for us in six months.

Capability summary

EmaLite is an enterprise technology company in Riyadh. We design, build and support network, data centre, cloud and security infrastructure, including the physical layer underneath it.

AREA	SCOPE
Network infrastructure	Campus and data centre switching, routing, SD-WAN, enterprise wireless, monitoring and assurance
Data centre	Spine-leaf and policy fabrics (Cisco ACI, VXLAN, BGP EVPN), compute, storage, virtualisation, commissioning
Cybersecurity	Next-generation firewalls, segmentation, identity-aware access, inspection, assessment and architecture review
Cloud & continuity	Hybrid design, migration and modernisation, backup, replication, disaster recovery and tested failover
Managed services	24/7 monitoring, patch and lifecycle management, service desk, backup operations, SLA reporting
Software & automation	Systems integration, configuration as code, provisioning workflows, internal portals, observability
Advisory & design	HLD, LLD, as-built documentation, gap analysis, roadmap definition, vendor-neutral selection
Identity & data security	Identity governance, privileged access, classification and DLP, encryption and key management
Backup & cyber recovery	Immutable and air-gapped copies, replication, DR design, timed restore testing
Business applications & workplace	ITSM and service desk, modern workplace, business applications, voice, contact centre and meeting rooms
Physical infrastructure	Containment, structured cabling, patch fields, racks and power — installed, certified and documented

Delivery and handover

ENGAGEMENT MODELS

Project · Services · Managed · Supply

Fixed-scope delivery, embedded professional services, ongoing managed support, or hardware and licensing supply

SECTOR EXPERIENCE

Banking · Government · Education · Industry

Including regulated environments with audit and documentation obligations

HANDOVER

HLD · LLD · As-built · Runbooks

Under version control, written so another competent engineer can pick the estate up

SUPPORT

Named escalation path

Response and resolution targets written into the agreement where a managed agreement is in place

Technologies

CISCO | CISCO ACI | HUAWEI | FORTINET | PALO ALTO | JUNIPER | VMWARE | MICROSOFT | COMMSCOPE | AVAYA | GIGAMON

REFERENCES

Named client references, including data centre, campus and security engagements in banking, government, education and manufacturing, are available on request.
